

Abdoul-Aziz ZOROM

AI Engineer & Senior Full-Stack Developer

Senior Full-Stack Developer and CTO with a strong track record delivering large-scale digital transformation platforms for governments and international institutions across Africa and North America. Combines deep full-stack expertise with hands-on AI engineering (Machine Learning, Agentic AI, Retrieval-Augmented Generation and LLM integration) to design secure, scalable platforms that move organizations forward.

EXPERIENCE

- **Since April 2024 | Chief Technology Officer (CTO) | YULCOM Technologies**
Lead the technical direction and full-stack development of large-scale national and international digital transformation projects. Oversee multidisciplinary teams and contribute directly to backend and frontend development using Laravel, Livewire, Spring Boot, Angular, Docker, CI/CD pipelines, etc., to deliver secure, scalable, and high-performance platforms.
- **Since November 2022 | Consultant - Lead Full-Stack Developer | BidOnMyTrip (United States)**
Engineered an innovative and user-friendly web platform designed to revolutionize travel planning and booking by allowing travel agents to compete in real time. Built with Laravel, Angular, Docker, OpenAI API, LangChain, and Elasticsearch.
URL: <https://www.bidonmytrip.com>
- **April - June 2023 | Consultant - Lead Full-Stack Developer | Class Navigator (Netherlands)**
Designed and implemented a complete and feature-rich school management platform built with the TALL stack (Tailwind CSS, Alpine.js, Laravel, Livewire).
URL: <http://staging-classnavigator.bytebrew.nl/>
- **May 2022 - March 2024 | Lead Full-Stack Web Developer | Yulcom Technologies**
Led the design and development of complex web platforms using Laravel, Livewire, Spring Boot, Angular and modern DevOps tools. Collaborated closely with cross-functional teams to deliver scalable, secure, and high-performance solutions for both national and international projects.
- **10/2020 - 04/2022 | Lead Full-Stack Developer | Switch Maker**
Led the end-to-end development of dynamic web applications, contributing to both backend and frontend layers using Laravel, Vue.js and Livewire. Designed and implemented scalable architectures, optimized performance, and ensured code quality through best development practices.

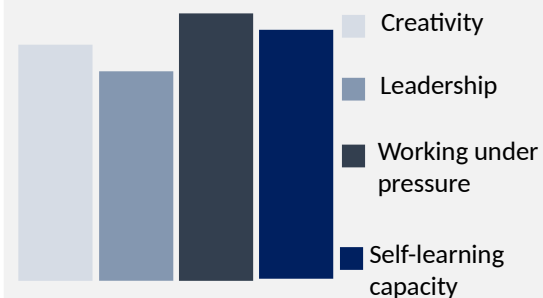

TRAINING

- **2025-Now - Master of Science in Artificial Intelligence - AUBE Nouvelle University**
- **2026 - Machine Learning Specialization - Stanford**
- **2025 - IBM RAG & Agentic AI Professional Certificate - IBM**
- **2017 - Bachelor's degree - AUBE Nouvelle University (Bobo Campus)**
Obtained the diploma of engineer of computer work option network technologies and computer systems
- **2014 - BAC D - Lycée Provincial des Banwa**
Obtaining the baccalaureate diploma series D

PERSONALITY

Languages

English

French

Moore

Dioula

- **April - May 2021 | Laravel Trainer | Switch Maker**
Training of more than 100 people in Laravel and in the development techniques of E-services solutions within the framework of the E-Burkina Project for the extension of the virtual counter of the public administration

- **11/2018 | Attending AfricaCom 2018 in Cape Town, South Africa | Orange**
AfricaCom is the largest gathering of technology companies on the African continent. By invitation from Orange, we were able to participate in a global event.

- **Since 08/2018 | Founder of DigiClass**
DigiClass is an online learning platform created in 2018 with the mission of improving the academic level of students in Africa through the use of ICT.
Website: www.digiclass.co

- **02/2018 - 03/2018 | Web Developer | DILIGO**
Development of a showcase site for the Catholic University of West Africa.
Website: <http://ucaouub.com/>

- **06/2017 - 01/2018 | Web Developer | Switch Maker**
Automation of IT services with Ansible.
Developed E-Compétences, the Burkinabe government's platform cataloging the IT skills of national companies and consultants.
Website: <http://www.e-competences.gov.bf/>

- **03/2016 - 05/2016 | Implementation of a voip (voice over IP) system | U-AUBEN**
Implemented a VoIP system to make free phone calls over the network using open-source solutions, including "Asterisk".

- **12/2016 - 09/2017 | Developer | MyStudentWeek**
Member of the development team of MyStudentWeek winner of POESAM, GenieTIC 2016 and National Internet Week (NIS) Hackathon 2016. MyStudentWeek is a time management platform for universities and institutes.
Website: <https://www.mystudentweek.com>

AWARDS AND DISTINCTIONS

- ▶ **08/2020 - 11/2020 - Participation in the Founder Institute program.**
The Founder institute is a training and coaching program for entrepreneurs around the world.
- ▶ **09/2020 - Winner of GenieTIC.**
GenieTIC is a competition to detect young talents in Burkina Faso.
- ▶ **10/2018 - AFIDBA Winner.**
I was one of the 4 national winners of the AFIDBA (AFD For Inclusive and Digital Business in Africa) Entrepreneurship Program
- ▶ **09/2018 - POESAM International Laureate**
Winner of the POESAM 2018 Special Content Award at the international level
- ▶ **03/2018 - Winner of #TEF Program**
Winner of the Tony Elumelu Foundation's Entrepreneurship Program with the DigiClass project.
- ▶ **10/2018 - Certificate in Entrepreneurship Training awarded by the Tony Elumelu Foundation.**

AREAS OF INTEREST

- **Hobbies:** Reading, Travel, Meditation, Social networking.

AI EXPERTISE

- ✓ **Machine Learning**
 - ❖ scikit-learn for regression, classification, and clustering algorithms.
 - ❖ TensorFlow for neural network design and training.
 - ❖ NumPy and Pandas for numerical computing and data manipulation.
- ✓ **Agentic AI & Multi-Agent Orchestration**
 - ❖ LangChain and LangGraph (agent workflows, orchestration).
 - ❖ CrewAI, AG2 (AutoGen), IBM BeeAI (multi-agent systems, memory, feedback loops, autonomous behavior).
 - ❖ Agentic RAG, agents with memory, iteration, conditional logic.
 - ❖ LlamaIndex (retrieval pipelines with LLMs).
- ✓ **Retrieval-Augmented Generation (RAG)**
 - ❖ RAG application design (full pipelines, retrievers).
 - ❖ Vector databases & retrievers (advanced techniques).
 - ❖ FAISS and ChromaDB for vector search.
- ✓ **Multimodal GenAI**
 - ❖ Building multimodal generative AI applications (text + audio, images, videos).
- ✓ **Prompting & Tool Use**
 - ❖ Prompt engineering and function calling for LLM apps.
- ✓ **Model & API Integration**
 - ❖ OpenAI API (LLM integration in production).
 - ❖ Groq API
 - ❖ Ollama
 - ❖ Elasticsearch for vector search / retrieval in RAG pipelines.
 - ❖ Claude API (Anthropic) for LLM integration.
- ✓ **NLP & Data Extraction**
 - ❖ sentence-transformers for semantic search embeddings.
 - ❖ spaCy for language processing.
 - ❖ Docling for advanced OCR on scanned documents.

Certifications & Achievements

Machine Learning Specialization

Stanford Online / DeepLearning.AI - Jul 2026

<https://coursera.org/verify/specialization/QLFBODR8T1MZ>

IBM RAG and Agentic AI Professional Certificate

IBM / Coursera - Sep 2025

<https://coursera.org/verify/professional-cert/0TI07UB3R97Z>

Building AI Agents and Agentic Workflows (Specialization)

IBM / Coursera - Sep 2025

<https://coursera.org/verify/specialization/25UWS5XT1U5W>

RAG for Generative AI Applications (Specialization)

IBM / Coursera - Aug 2025

<https://coursera.org/verify/specialization/9B3ND26WFMVJ>

Senior Laravel Certification – Laravel 12

LARAVEL Certifications - Jan 2026

Use Ansible to Automate Configuration Tasks

OpenClassrooms – Feb 2020

[Certificate #6354638916](#)

Appendix: Some achieved projects

In the following sections, you will find some of my achievements.

Note: Projects with unspecified links are either private projects or intranet projects.

► TenderAI

AI multi-agent system automating daily monitoring, classification, and reporting of public IT tenders.

YULCOM Technologies (Internal) | Tech Lead | 02/2026 - 07/2026 | Burkina Faso

► SYLVIE V2 - Import/Export Virtual Link System

SYLVIE V2 (Système de Liaison Virtuel pour les Opérations d'Importation et d'Exportation — Virtual Link System for Import/Export Operations) is the modernized version of Burkina Faso's electronic single window for foreign trade. It centralizes, digitizes and streamlines all administrative and customs procedures related to import-export operations.

World Bank | Full-Stack Dev & Tech Lead | 2023-2025 | Burkina Faso

► BidOnMyTrip

BidOnMyTrip is a travel booking platform where travel agents compete in real time to offer users the best deals. This platform has been developed with Laravel and Angular.

URL: <https://www.bidonmytrip.com/>

BidOnMyTrip | Lead Full-Stack Dev | 2021 | Burkina Faso

► Class Navigator

Class Navigator is a complete and feature-rich school management platform.

This platform was developed with the TALL stack (Tailwind CSS, Alpine.js, Laravel, and Livewire)

URL: <http://staging-classnavigator.bytebrew.nl/>

Class Navigator | Lead Full-Stack Dev | 2021 | Burkina Faso

► DigiClass

DigiClass is a web and mobile platform for online and home courses that allows:

Students from 6th to 12th grade can access courses, exercises and quizzes to learn, practice and self-evaluate.

The students parents can easily find a qualified teacher for their children's home schooling, monitor and pay for the teacher's services online.

URL: <https://www.digiclass.co/>

DigiClass | Lead Full-Stack Dev | 2021 | Burkina Faso

► Associations and political parties virtual counter

The Single Window for Associations is a platform for the administrative management of associations (national associations, foreign associations, unions, foundations), political parties and formations developed for the Ministry of Territorial Administration, Decentralization and Security (MATDS). This platform allows the MATDS to manage from end to end the whole circuit of management and follow-up of an association, a party or a political formation. The platform allows MATDS to manage Non Profit Organizations (NPO) in the framework of the fight against money laundering and terrorism financing.

The platform also allows the Official Gazette to manage the publication of the recognition acts of associations. Developed with Laravel, the platform is designed to be used at the central, regional and provincial levels.

URL: <https://www.dglpap.gov.bf>

Ministry of Territorial Administration | Lead Full-Stack Developer | 2021 | Burkina Faso

► Public Procurement e-Document Delivery System

Electronic system for delivering official documents within the public procurement process.

Ministry of Finance | Mission Lead & Tech Lead | 2024-2026 | Burkina Faso

► National Local Content Promotion Platform

Digital exchange connecting local suppliers with buyers to promote domestic content.
Ministry of Mines and Quarries | Mission Lead & Tech Lead | 2024-2026 | Burkina Faso

► Military Domain Information System

Information system supporting administrative operations in the military domain.
Ministry of Defense | Full-Stack Developer | 2022-2023 | Burkina Faso

► Hospital Information System

Hospital information system supporting patient care management at CHR Manga.
CHR Manga (PADS-PCCS) | OpenClinic Expert & Full-Stack Dev | 2022-2023 | Burkina Faso

► Lebonken

Lebonken is a Marketplace that allows users to have an online store, to sell and buy. Lebonken was developed with Laravel.

URL: <https://www.lebonken.com/>

SWITCH-MAKER | Lead Full-Stack Dev | 2021 | Burkina Faso

► CV Management Platform

Platform enabling recruiters and candidates to create, submit, and track CVs online.
Kenaya Impact | Mission Lead & Tech Lead | 2025-2026 | Burkina Faso

► Institutional Web Portal & Distributor Management Platform

Corporate website coupled with a platform to manage the company's distributor network.
SN-BRAFASO | Mission Lead & Tech Lead | 2025-2026 | Burkina Faso

► Hospital Information System - e-Patient Record

Audit and development of e-patient record modules for Burkina Faso's digital health program.
PACTDIGITAL-BF | OpenClinic Expert, Tech Lead & Full-Stack Dev | 2025-2026 | Burkina Faso

► WebGIS Platform

Web-based GIS platform for managing national statistical and geographic data.
INSD (National Institute of Statistics) | Management Support & Full-Stack Dev | 2024 | Burkina Faso

► Legal & Regulatory Monitoring Application

Application for tracking legal and regulatory updates in electronic communications.
ARCEP | Management Support & Full-Stack Dev | 2024 | Burkina Faso

► Business Platform & Website Enhancement

Business management platform and website upgrade for Burkina Faso's electricity utility.
SONABEL | Full-Stack Developer | 2022-2024 | Burkina Faso

► E-Learning Platform

Online learning platform supporting course delivery for Ontario post-secondary institutions.
eCampus Ontario | Full-Stack Developer | 2023 | Canada

► Geospatial Portal

Geospatial data portal supporting ONEA's water infrastructure planning.

ONEA | Management Support | 2025 | Burkina Faso

► Reforestation Digital Capitalization Solution

Digital solution for tracking and reporting national reforestation initiatives.

Ministry of Environment, Water & Sanitation | Mission Lead & Tech Lead | 2025 | Burkina Faso

► Burkina Entry Portal (PEB)

Online portal centralizing entry formalities for businesses and travelers entering Burkina Faso.

Ministry of Commerce | Full-Stack Developer | 2025-2026 | Burkina Faso

► Tribunal Administratif du Quebec - Web Platform

Public-facing web platform for Quebec's administrative tribunal case services.

Tribunal Administratif du Quebec (TAQ) | Tech Lead & Full-Stack Dev | 2023-2025 | Canada

► AgriTube

AgriTube is a platform for agricultural training through videos in the local languages of Burkina Faso. AgriTube was developed with Laravel for the benefit of the Ministry of Agriculture, Hydro-Agricultural Development, Mechanization and Animal and Fisheries Resources.

URL: <https://agritube.gov.bf>

Ministry of Agriculture | Lead Full-Stack Developer | 2021 | Burkina Faso

► Digitalisation of Occupational Health Records

Digitized occupational health records and case tracking for Burkina Faso workers.

Office of Occupational Health (OST) | Mission Lead & Tech Lead | 2025-2026 | Burkina Faso

► INICI Integration Zone Platform

Integration platform connecting INICI's internal systems and partner services.

INICI | Full-Stack Developer | 2022-2025 | Canada

► Website Redesign

Redesigned the public website of Quebec's infrastructure agency for better usability.

Societe quebecoise des infrastructures (SQI) | Full-Stack Developer | 2023-2024 | Canada

► Web Portal Redesign & Maintenance

Redesigned and maintained the web portal for Northwest Territories councils.

Northwest Territories Councils | Full-Stack Developer | 2022 | Canada

► Intranet Authentication Portal

Centralized authentication portal for CIUSSS's internal intranet services.

CIUSSS | Full-Stack Developer | 2023 | Canada

► Labor Market Monitoring Mechanism

Platform monitoring labor market trends and dynamics in Togo.

UNDP | Full-Stack Developer | 2022-2023 | Togo

► Radio & Mobile App - Radio Jeunesse Sahel

Website and mobile app for a youth-focused community radio station in the Sahel.

Projet Radio Jeunesse Sahel (RJS) | Developer & Trainer | 2022 | Burkina Faso

► Platform for the management of civil status documents

Created within the E-Burkina project, this platform allows:

- Users to submit applications for civil status documents.
- The civil status administration of all the town halls in Burkina Faso is responsible for managing the entire application processing circuit up to the generation of the requested copies of civil status documents.

This platform was developed with Laravel.

Ministry of Territorial Administration | Lead Full-Stack Developer | 2021 | Burkina Faso

► GovPay

GovPay is an electronic payment platform for the online services of the Burkina Faso public administration.

Developed with Laravel, GovPay has been designed to embed several payment methods.

Ministry of Digital Transition | Lead Full-Stack Developer | 2021 | Burkina Faso

► SMGES

SMGES is an accounting management platform that lets companies manage their accounting more easily, even without prior accounting knowledge. The platform automatically generates all financial statements for the company.

SMGES has been developed with Laravel and is compliant with OHADA accounting standards.

SWITCH MAKER | Lead Full-Stack Developer | 2021 | Burkina Faso

► Registration platform for the National Agricultural Training School (ENAFa) of Matourkou.

This platform has been realized within the context of the E-Burkina project and allows:

- Candidates who wish to apply to ENAFa of Matourkou can submit their applications online and pay their application and tuition fees in case of admission.
- Enables the administration of the ENAFa of Matourkou to manage applications and training sessions.

The registration platform for ENAFa in Matourkou was developed with Laravel.

URL: <https://inscriptions-enafa.gov.bf>

Ministry of Agriculture | Lead Full-Stack Developer | 2021 | Burkina Faso

► E-Compétences

E-Compétences is a directory of IT skills of companies and consultants in Burkina Faso. E-Compétences was developed in PHP for the Ministry of Digital Transition, Posts and Electronic Communications.

URL: <http://www.e-competences.gov.bf/>

Ministry of Transition Digital | Lead Full-Stack Developer | 2021 | Burkina Faso

► VOIP System

Set up a Voice over IP system at Aube Nouvelle University (Bobo) enabling telephone calls over the IP network, built with "Asterisk," an open-source VoIP technology.

Aube Nouvelle University | Lead Full-Stack Developer | 2017 | Burkina Faso
